PRACTICAL HELP FOR OWNER-RUN BUSINESSES

RANC OS

One app for till, stock, staff and compliance.

Till

Stock

Staff & rota

Payroll

HACCP

Training

Invoices

Clock-in

Ready 2027

19 modules built and being tested with sample data. Not live yet: no business uses RANC OS today.

RANC consulting, offered now

Profitability review · operations & processes · retail & small business · analysis & market research

Try our demo: ranc.ie/demo · ranc.ie · hello@ranc.ie

v15 · November 2026 · Screens show fictional sample data

Ready 2027

Too many apps. Too many bills.

17

separate companies to cover the software jobs of one small café

€960

a month, about €11,570 a year, using the cheapest published tool for each job

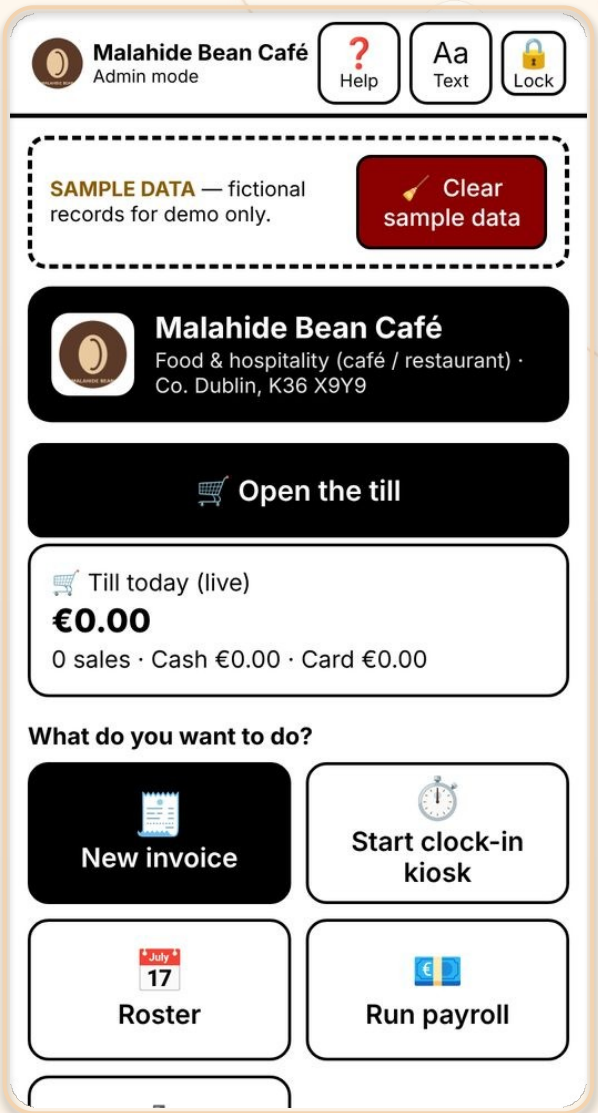

Till / POS · Accounting · Payroll · Consultancy · Social media · Music · HACCP · Temperature · Stock · Staff · Compliance · Reports · Devices · Sync & backup · Security · Customers · Platform

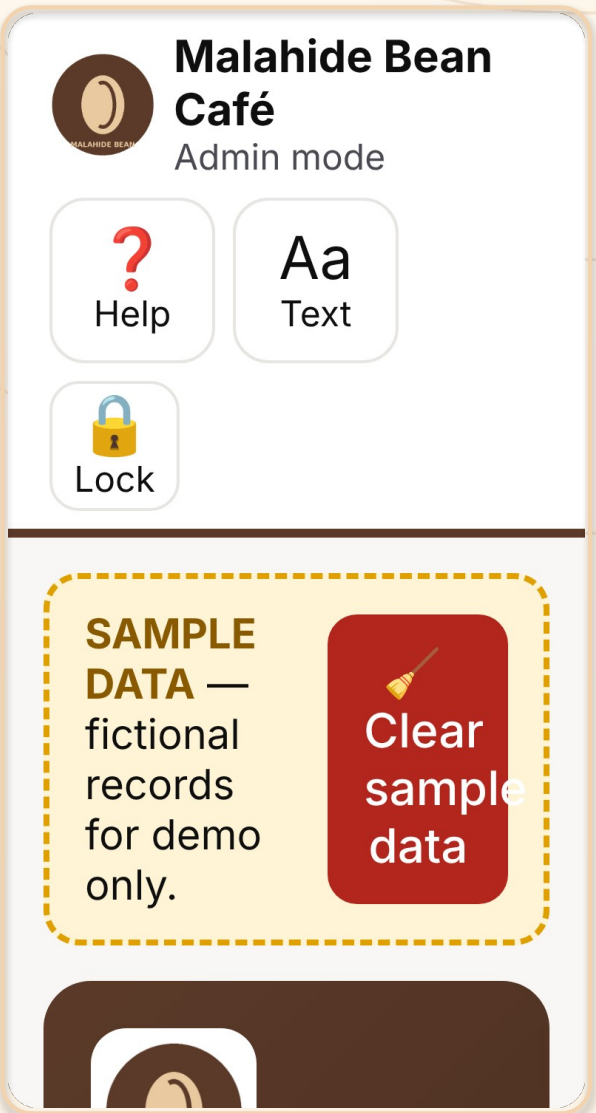

RANC OS: one system, 17 modules, 162 planned features.
Ready 2027. Every module still in testing.

1-site café, public list prices ex VAT and card fees, checked 16 Oct 2026. Your own costs will differ. Illustrative, not a guarantee. Source: ranc.ie/ranc-os/savings.

One app.
Anyone can use it.

Simple enough for anyone on your team: big text and buttons on every screen.

Text size S–XL

Pick the size each person needs

High contrast

Strong colours, easy in bright light

Plain words

No jargon, short labels

Screens from the RANC OS app with fictional sample data (Malahide Bean Café). Ready 2027.

19 modules built.
Being tested now.

19	17	162
modules built	module areas	planned features

Core & finance
BUILT · IN TESTING

Invoicing · Customers · Bookkeeping & VAT (VAT3, P&L) · Budgets

Staff & time
BUILT · IN TESTING

Employees · Payroll estimates · Payslips · Leave · Rota · Clock-in kiosk

Staff & HR
BUILT · IN TESTING

Onboarding · Training records (in-house) · Tip sharing

Stock & till
BUILT · IN TESTING

Stock · Point of sale (card recorded from your own reader) · Gift vouchers

Compliance
BUILT · IN TESTING

HACCP records · Checklists · Health & safety records

Built means built and being tested with sample data, not launched. No business uses RANC OS yet. The other modules, like suppliers, promotions and allergens, follow. Every module is Ready 2027.

17 module areas and 162 planned features: the module list on ranc.ie/ranc-os.

Accessibility, built in from the start.

We are designing RANC OS to WCAG 2.2 AA and testing it with blind, low-vision, deaf and hard-of-hearing users.

Text size and contrast

BUILT · IN TESTING

Text size S to XL and a high-contrast mode, on every screen.

Voice control and spoken totals

PLANNED

Starting with the languages that pass our testing.

Visual and vibration alerts

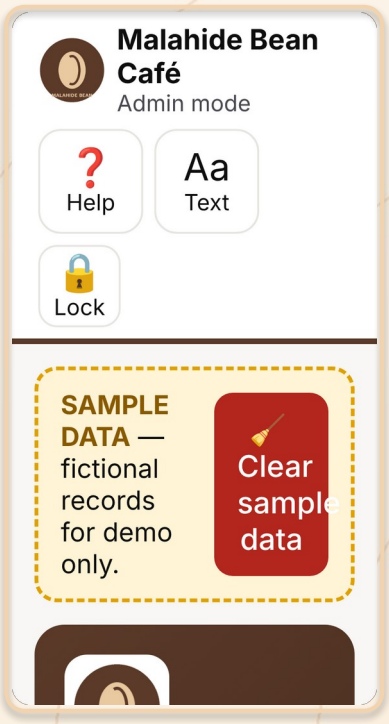

PLANNED

Instead of beeps, for staff who are deaf or hard of hearing.

Plain words

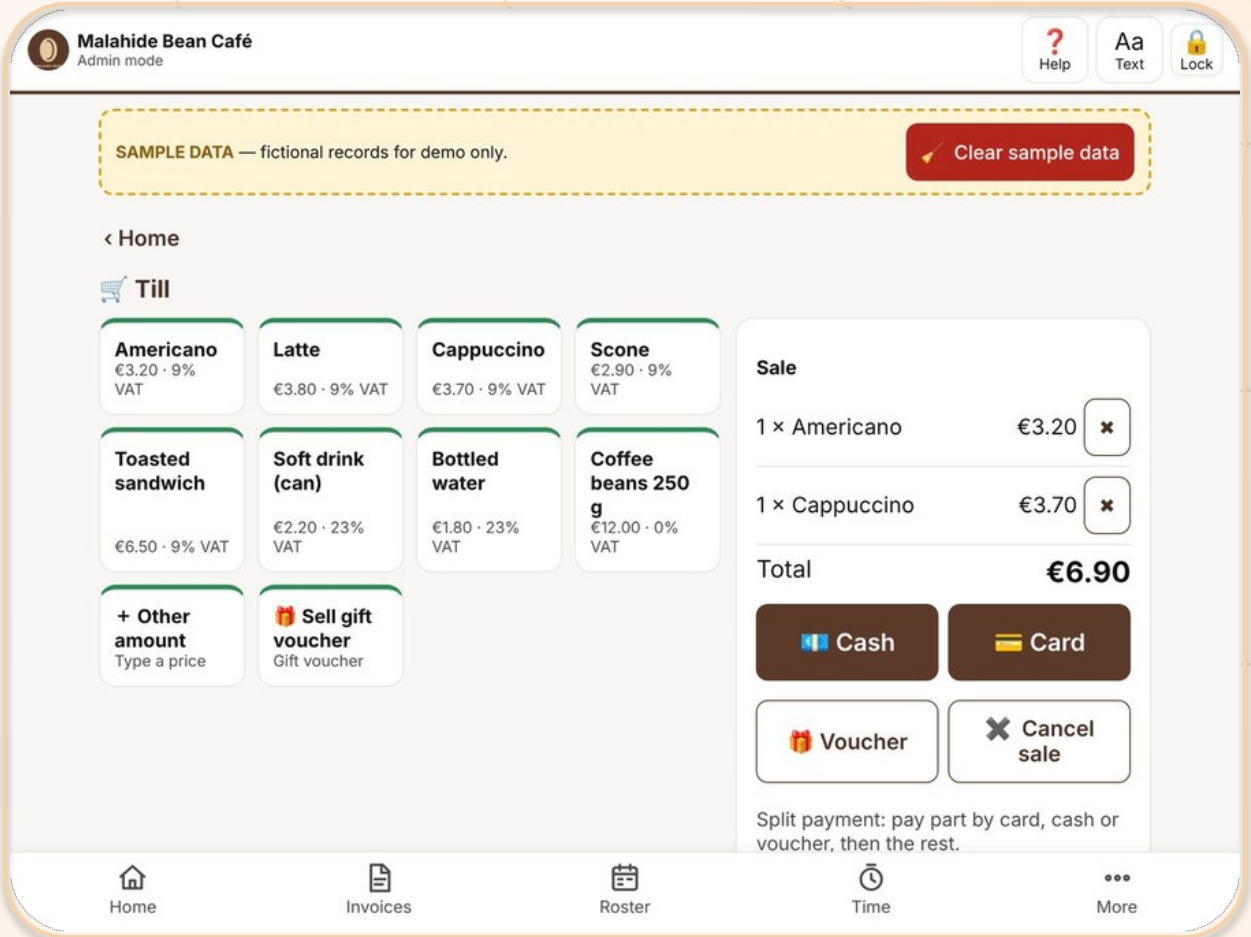

PLANNED

Short labels and simple steps, checked with real users.

All planned for Ready 2027.

A till that does the sums for you.

BUILT · IN TESTING

- Quick keys and custom amounts
- Cash with change calculator
- Split payments
- Refunds with manager PIN
- Tips and gift vouchers
- Float, paid-in and paid-out
- Cash-up by denomination
- X and Z reports (PDF)

PLANNED

- Integrated card payments
- Kitchen display screen
- Age-restricted sales
- Weighed and deli items
- Promotions at the till
- Deposit Return (Re-turn)
- Delivery apps

Card: you key the amount into your own card reader, and the till records it. Card reader and its fees are paid to your provider. Not yet tested on real printers or cash drawers.

Know what is on the shelf.

Stock catalogue with barcodes

BUILT · IN TESTING

Items, stock levels and stock takes.

Suppliers and price lists

PLANNED

Keep each supplier and what they charge.

Purchase orders and goods in

PLANNED

Order, receive and match the delivery.

Waste log

PLANNED

See what was thrown out and why.

PLANNED: SUGGESTED ORDERS

1

Your till sales

What sold, day by day

2

Suggested order

Based on what sold

3

You check and send

Nothing is sent without you

Online edition, planned: supplier price comparison. Upload price lists, see the cheapest supplier for each item and get price-rise alerts.

Suggested orders, recipe costing and stock transfers are on the ranc.ie module list as planned. Ready 2027.

Offers that follow the price rules.

Set up time-limited shop offers: meal deals, multibuys and price reductions, with checks so tickets show the offer dates and the lowest price from the last 30 days.

Offer types you choose

PLANNED

Set price, % or € off, 3 for 2, cheapest item free or half price, meal-deal bundles.

The better deal for the customer

PLANNED

If two offers could apply, it keeps the one that takes most off. A line is never discounted twice.

A go-live checklist

PLANNED

7, 14 or 21-day window, overlapping offers, 30-day prior price and ticket wording, before an offer goes live.

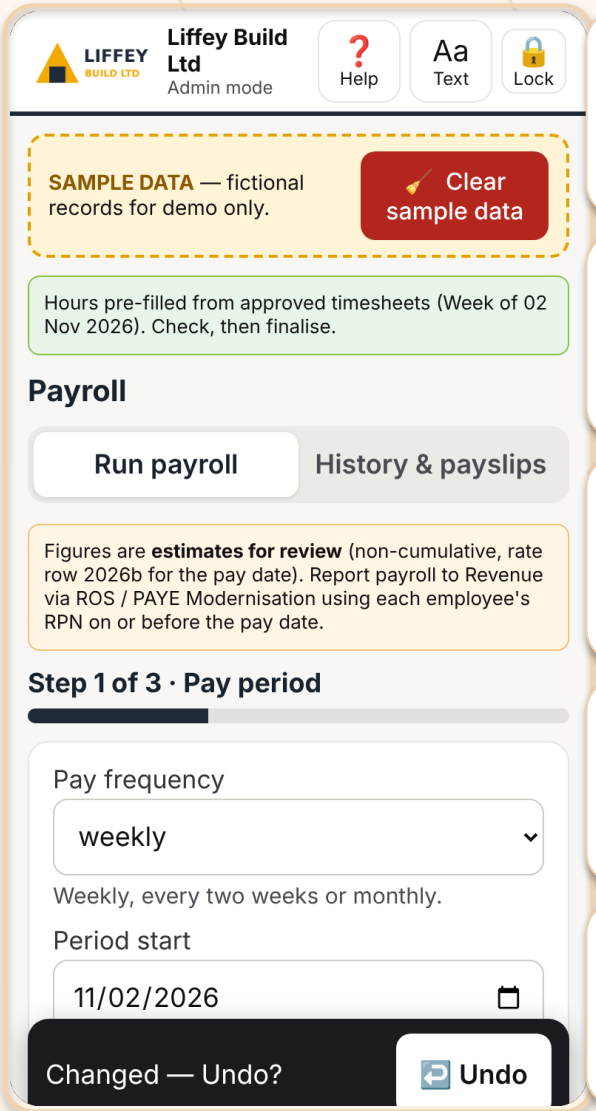

Print-ready tickets

PLANNED

A4 shelf and window tickets and posters that always show the offer dates and the 30-day lowest price.

Ready 2027. Offers are not applied at the till today, and nothing is posted to social media. The checks help with Irish and EU price-reduction rules; they are not legal advice.

Payroll and books, in one place.

BUILT · IN TESTING

Invoicing

Irish VAT invoice rules, PDF and share

BUILT · IN TESTING

Bookkeeping & VAT

Journals, trial balance, P&L, VAT3

BUILT · IN TESTING

Payroll estimates

PAYE, USC and PRSI

BUILT · IN TESTING

Payslips

PDFs and staff self-service

BUILT · IN TESTING

Tip sharing

Tips shared out through payroll

PLANNED

- Journal export to Xero, Sage 50, Surf or CSV
- Expense claims, RCT, tronc, lodgements and bank feeds
- VAT and payroll filing with Revenue (ROS), PAYE Modernisation submission

RANC never holds your money or bank logins. Figures help you prepare; they are not tax or accounting advice.

Know your numbers.

BUILT · IN TESTING

Books and P&L

Profit and loss, VAT3, charts

BUILT · IN TESTING

Budgets per site

Labour and sales budgets

BUILT · IN TESTING

X and Z reports

From the till, as PDF

PLANNED

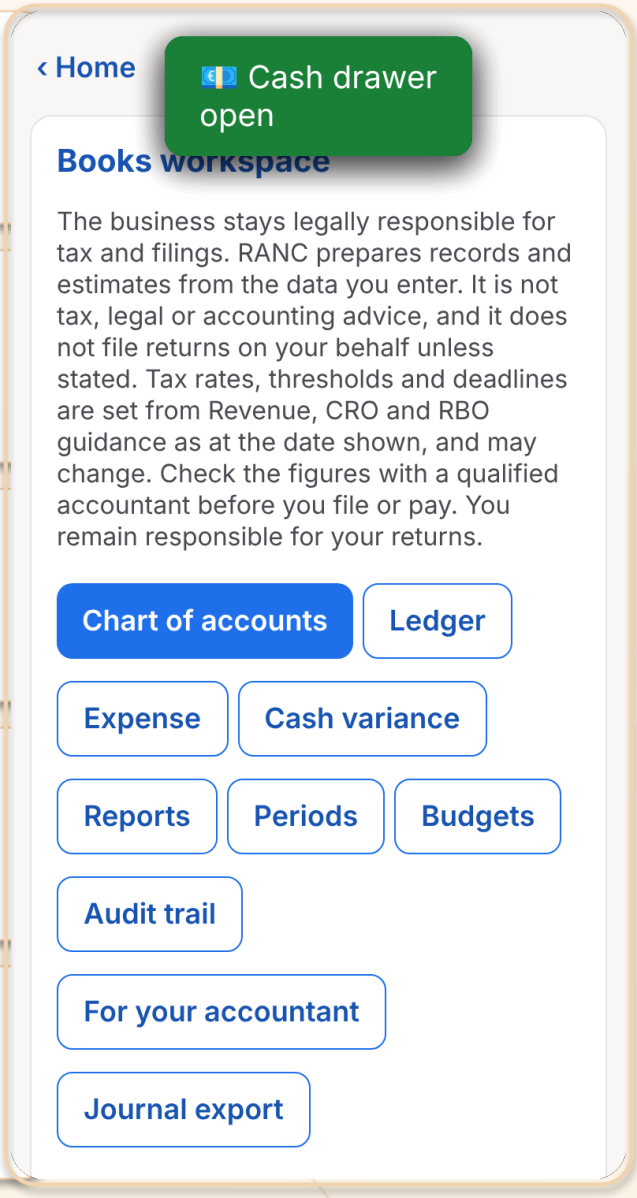

Owner dashboard

Sales, wages %, stock, cash

PLANNED

Multi-site reports

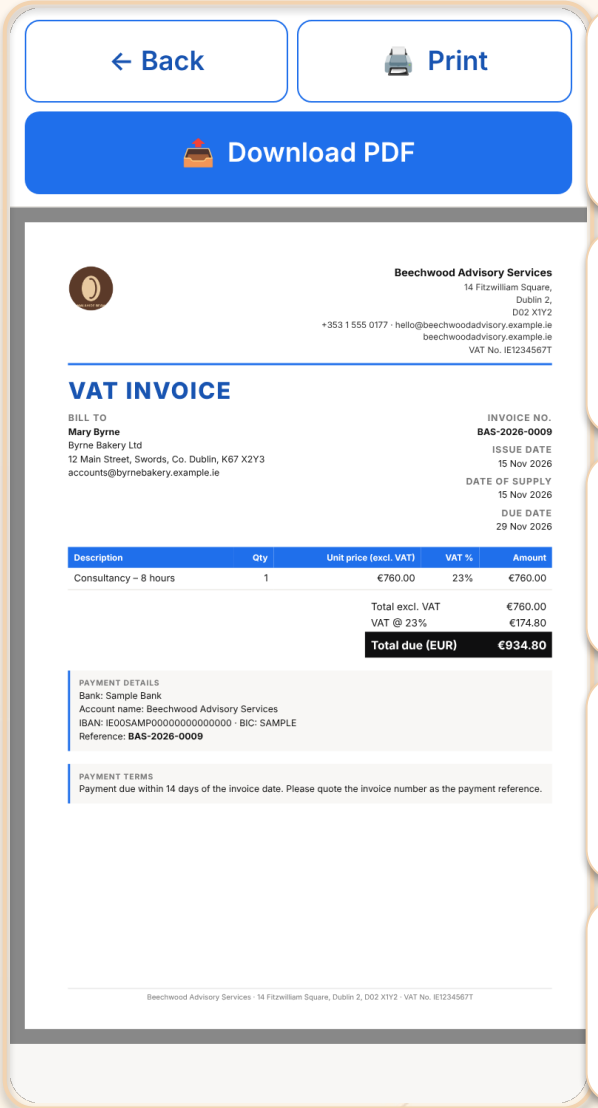

Weekly digest by email

Also planned: live sales and heatmaps, week and year comparisons, and multi-outlet views for owners with more than one site.

Owner dashboard and reports are Ready 2027 and not built yet. Figures help you prepare; not accounting advice.

Invoices out.
Paid on time.

BUILT · IN TESTING

VAT invoices
PDF, share, paid and unpaid

BUILT · IN TESTING

Customer list
Saved customers and history

BUILT · IN TESTING

Gift vouchers
Sold and redeemed at the till

PLANNED

Credit notes
With VAT checks

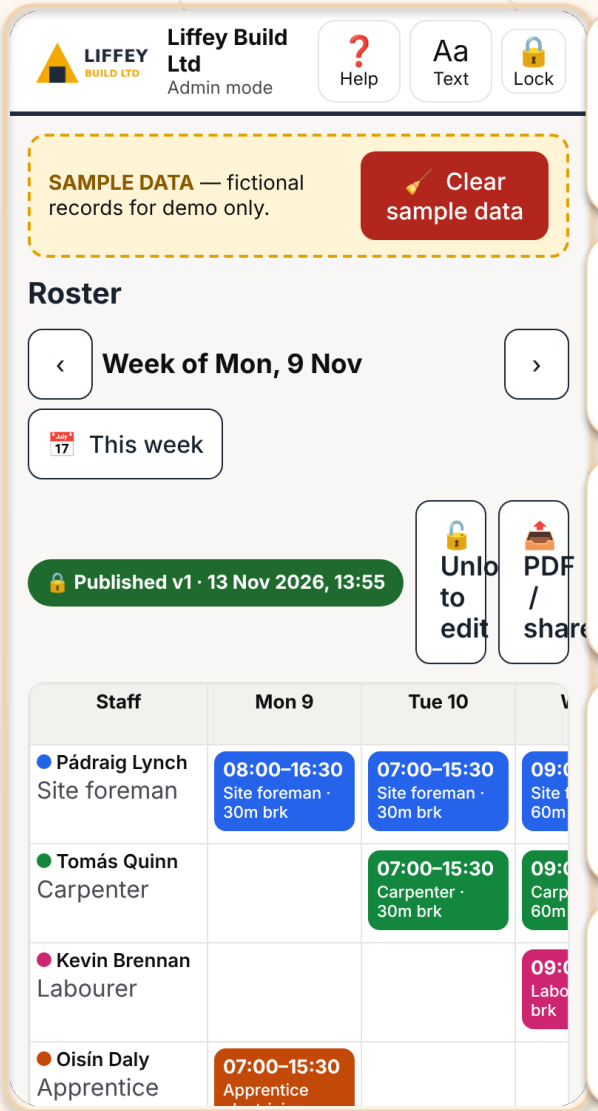

PLANNED

Statements & direct debits
For account customers

Also planned: purchase orders, supplier goods-receipt matching, loyalty and CRM, bookings with reminders, and an online shop.

Ready 2027. Screens show fictional customers and amounts.

Rota, clock-in and leave, sorted.

BUILT · IN TESTING

Staff records

One file per person, PINs

BUILT · IN TESTING

Rota

Plan, publish, staff view

BUILT · IN TESTING

Clock-in kiosk

Shared tablet, timesheets

BUILT · IN TESTING

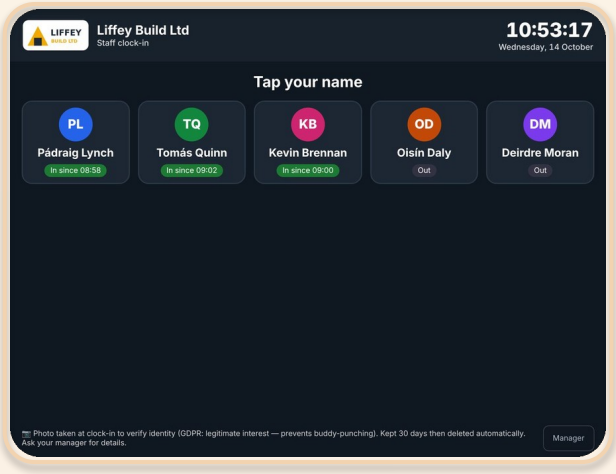

Leave

Balances, Irish public holidays

BUILT · IN TESTING

Onboarding

New-starter checklist

PLANNED

- Shift swaps and availability
- HR documents
- Staff emails
- Noticeboard and tasks
- Recruitment and job ads

Ready 2027. Fictional staff and PINs. Not employment-law advice.

Training records that remind you.

Keep a simple in-house record of what each person has completed, when it runs out and who is due a refresher.

BUILT · IN TESTING

On each staff file

Course, date and who signed it

BUILT · IN TESTING

2-year validity

Unless you set another end date

BUILT · IN TESTING

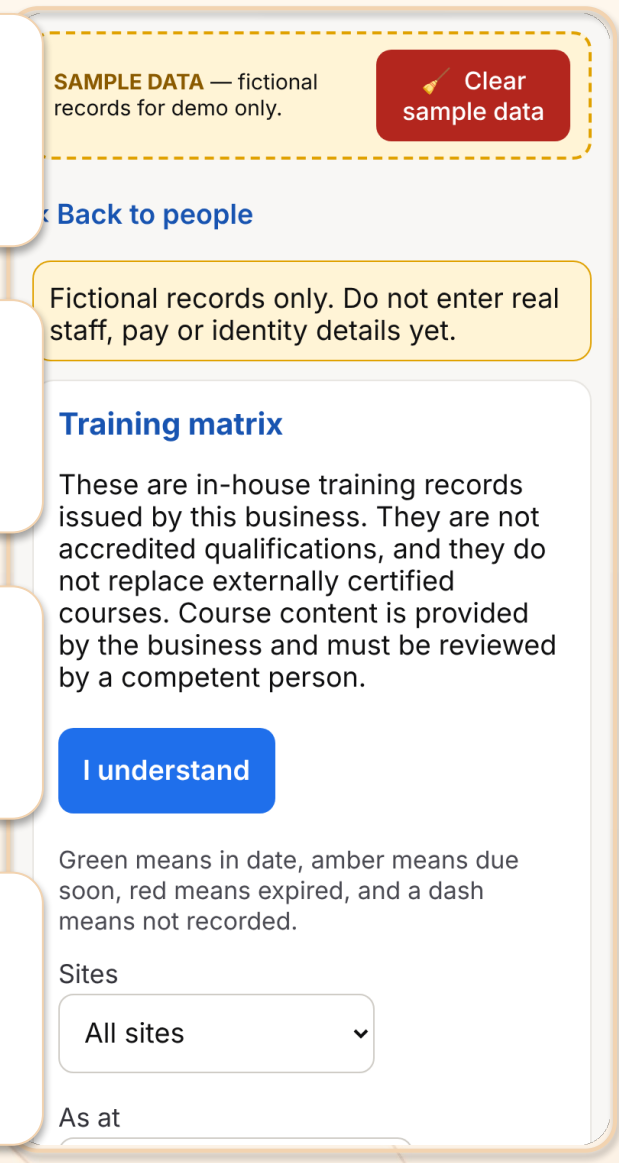

Reminders

At 60 and 30 days, and on expiry

BUILT · IN TESTING

Training matrix

In date, due soon, expired. Print, CSV or PDF

In-house records, not accredited qualifications. Not certified by the FSAI, QQI or any awarding body, and they do not replace externally certified courses.

Training records module: built and in testing. Ready 2027. Fictional staff.

Tagged once.
Shown everywhere.

For food businesses: tag the 14 EU allergens on each menu item and recipe.

- Celery
- Cereals (gluten)
- Crustaceans
- Eggs
- Fish
- Lupin
- Milk
- Molluscs
- Mustard
- Tree nuts
- Peanuts
- Sesame
- Soya
- Sulphites

On the till, labels and menus

PLANNED

From one allergen list, kept with each item.

Allergen matrix

PLANNED

A printable sheet for staff and customers.

A warning at the till

PLANNED

When a customer flags an allergy.

Allergens module: Ready 2027, not built yet. Not FSAI-endorsed. The business stays responsible for allergen information (EU 1169/2011, S.I. 489/2014).

Menus and posts, from one place.

Menu maker

PLANNED

Prices and allergens filled in from your items, no retyping. Print, screen or QR.

Menu publish

PLANNED

Update the menu once, everywhere you show it.

Post templates and captions

PLANNED

Branded templates and a content calendar.

Scheduling (Online edition)

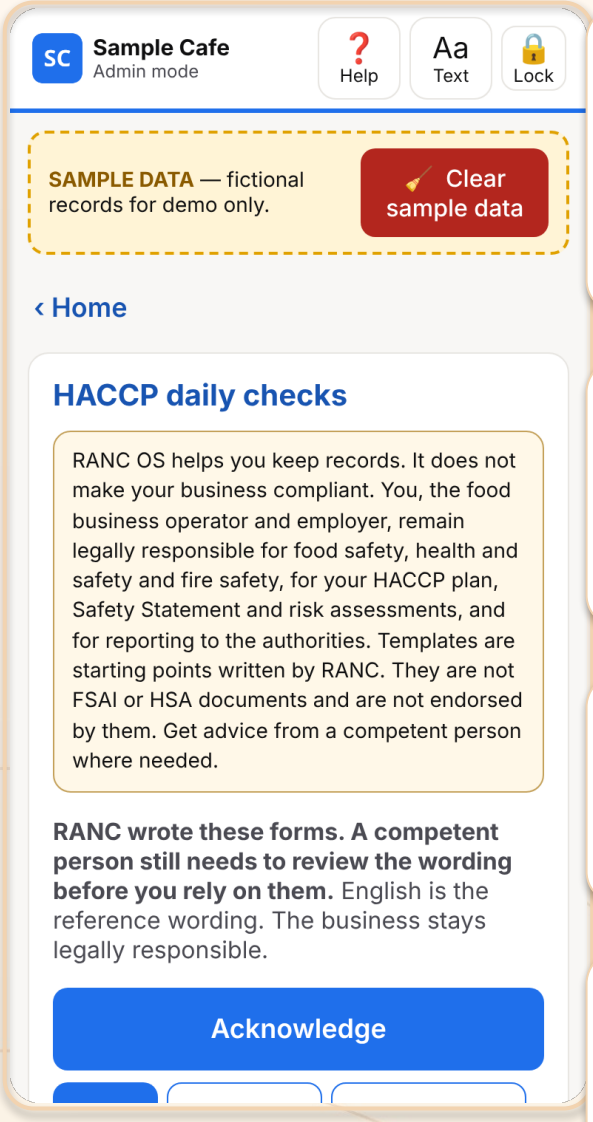

PLANNED

To Facebook, Instagram, X, LinkedIn and more. Nothing posts without your OK.

Ready 2027. Not built yet: there is no live posting to any social network today.

Facebook · Instagram · X · LinkedIn · and more

Food-safety records, kept every day.

BUILT · IN TESTING

Temperature logs

Fridge 0–5 °C, cook 75 °C, reheat 70 °C, hot hold 63 °C. Owner can edit limits

BUILT · IN TESTING

Daily checks

Opening, closing, cleaning and goods in

BUILT · IN TESTING

Sign-off and reminders

Late entries and amendments kept

BUILT · IN TESTING

Weekly pack

Print the week and blank forms as PDF

Helps you keep records; it does not make a business compliant. Templates are RANC starting points, not FSAI or HSA documents, and not endorsed by them. A competent person should review them first.

HACCP and checklists: built and in testing. Ready 2027. Default limits from published FSAI guidance.

Safety records, in plain words.

BUILT · IN TESTING

Incident book

Append-only, with corrections

BUILT · IN TESTING

Risk register

Hazards, actions, owners

BUILT · IN TESTING

Checklists

Daily, weekly and monthly

PLANNED

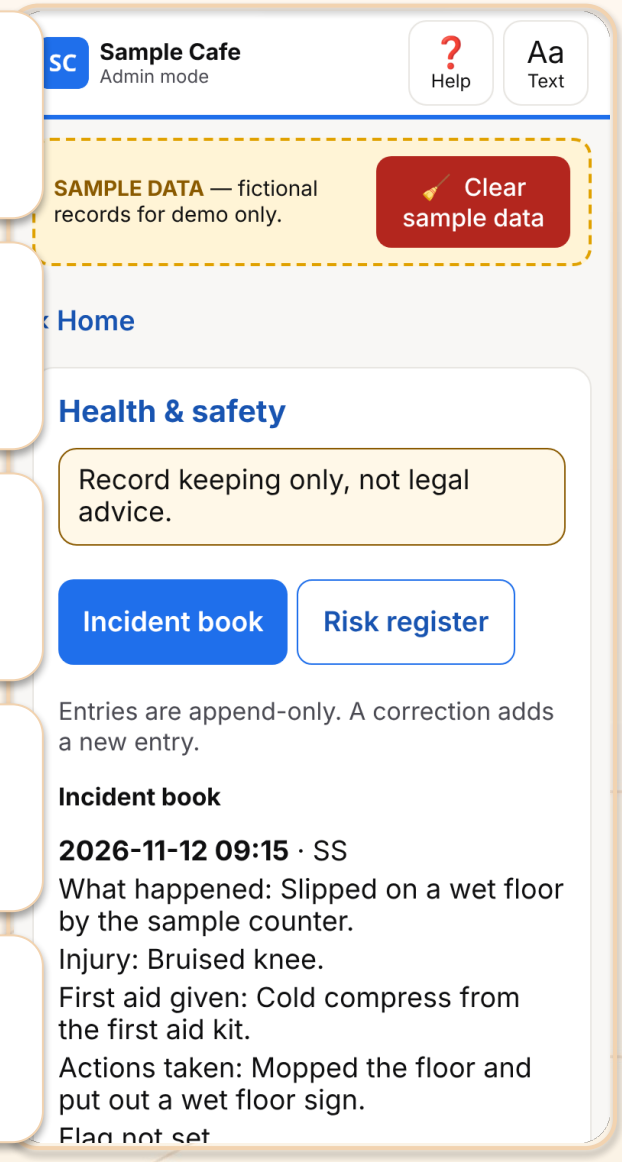

Safety Statement builder

Draft it step by step

PLANNED

Policy library

Staff read and sign

ALSO PLANNED

- Fire safety, audits and maintenance records
- Pest checks, complaints log and an inspection report reader

Record keeping only, not legal advice. The business stays responsible. Ready 2027.

Right date.
Right label.

Use-by dates
PLANNED
Logged at goods in, with daily fresh-food checks.

Prep and day-dot labels
PLANNED
With allergens printed in bold.

Shelf-edge labels
PLANNED
Matched to the till price, with unit prices where needed.

Batch trace and recall steps
PLANNED
Find which batch went where, with a recall record for staff to sign.

0–5 °C	75 °C	63 °C
fridge limit	cook	hot hold

Temperature limits already in the HACCP module (built, in testing).

Date labels and traceability: Ready 2027, not built yet. Helps you keep food-safety records; the business stays responsible.

Made for more businesses.

Cafés & food

HACCP, allergens, stock and suggested orders

Pubs & bars

Stock-loss alerts, Deposit Return, happy-hour rules

Events

Tickets printable or by phone, door check-in

Retail & forecourts

A fast till, shelf-edge labels, Deposit Return

Salons & barbers

Appointment bookings, client record cards

Trades & construction

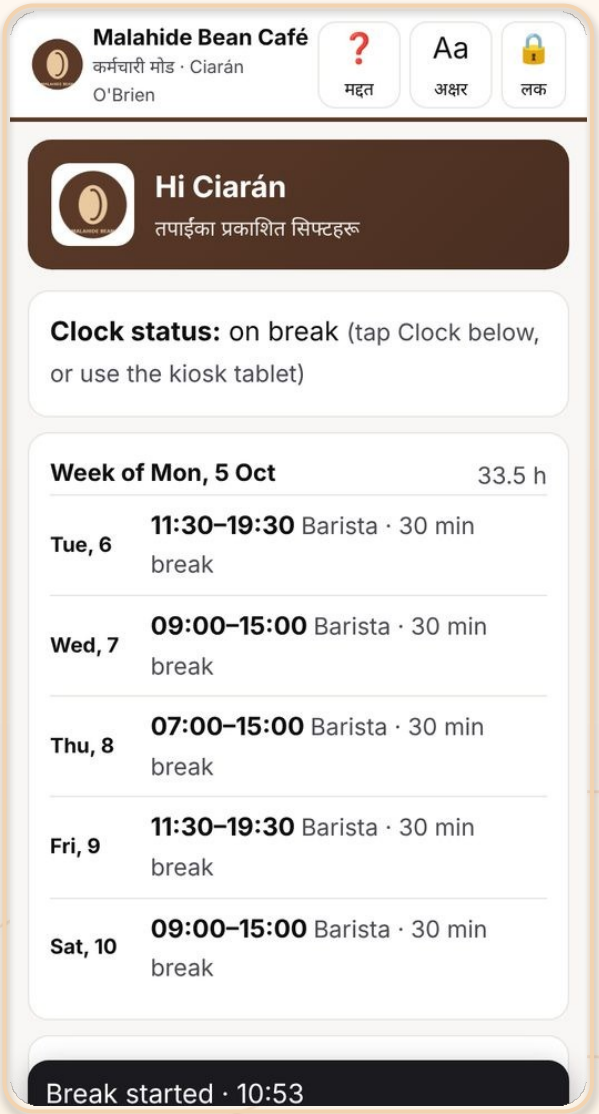

Accounts, payroll, staff training records

Consulting for every sector is offered now. RANC OS features per sector: Ready 2027. More on ranc.ie/industries.

Your team's language.
Your rules in English.

Staff screens, forms and labels in the languages your team speaks.

- English · official
- Gaeilge
- नेपाली Nepali
- हिन्दी Hindi
- Polski

8 app languages planned. English stays the official version for legal, allergen and training text. Other languages are drafts and are still being checked by native speakers.

Ready 2027. Screen: staff view in Nepali, fictional data.

Your data stays with you.

On your own devices

BUILT · IN TESTING

Your business records live on your tablet, phone or computer.

Export, backup and restore

BUILT · IN TESTING

Take a copy of your records whenever you want.

Switch modules on or off

BUILT · IN TESTING

Only use what you need.

Keeps going if the internet drops

PLANNED

Planned, and it must pass our reliability tests before launch.

Encryption on the device

PLANNED

Coming before the first live business uses RANC OS.

RANC never holds your money or your bank logins.

Ready 2027. Every module is still being tested with sample data.

Two editions.
Clear prices.

RANC OS Lite

no monthly fee

€500 + VAT

setup + €200 a year service plan per site

- Optional updates €100 a year
- First year €700 (€800 with updates)
- Multi-site: 2–5 sites €250 per extra site; over 5 sites €500 + €100 per extra site

RANC OS Online

connected

€1,000 + VAT

setup + €50 a month, updates included

- First year €1,600, then €600 a year
- Planned extras: online ordering, social media, supplier price comparison, integrated card readers, remote support
- Multi-site: ask us

All prices exclude VAT; RANC is VAT registered. Hardware extra. Installation included. Card, delivery and other provider fees are paid by you to those providers. Planned launch prices, Ready 2027.

What RANC OS could save you.

Example: a 1-site café, cheapest published tool for each job.

17 separate tools

€960

a month · about €11,570 a year

RANC OS Lite

€700

first year, then €200 a year (€800 / €300 with updates)

RANC OS Online

€1,600

first year, then €600 a year

Prices exclude VAT. Hardware and card fees are left out on both sides. Savings only apply once each module launches (Ready 2027), so nothing can be replaced yet. You will still need an accountant for year-end accounts and tax returns, and accredited training where the law asks for it.

Illustrative estimate from public list prices checked 16 Oct 2026, not a quote or a guarantee. Source: ranc.ie/ranc-os/savings.

What poor systems can cost.

Potential costs of poor systems, not savings. Real published examples:

Food safety (FSAI)
102 closure orders on Irish food businesses in 2025, published by name.

Employment (WRC)
Awards of €21k–€63k in recent food-business cases (2023–2025).

Tax (Revenue)
Interest on late VAT and PAYE is about 10% a year, plus penalties.

Good systems help you keep records; they do not guarantee compliance. You still need an accountant or auditor for statutory accounts, tax returns and Revenue advice.

Sources: FSAI (13 Jan 2026); WRC cases reported by RTÉ and The Irish Times (2023–2025); revenue.ie interest rates. Checked Oct 2026.

Pay for setup your way.

01 **Pay in full: 2% off** — € + VAT

Lite €490 · Online €980

02 **5 monthly instalments: +1%** — € + VAT

Lite 5 × €101 (€505 total) · Online 5 × €202 (€1,010 total)

03 **Multi-site too**

The same rule applies to any setup total.

04 **How instalments work**

Monthly direct debit, first payment at signing. For business customers.

Payment options apply to the one-off setup fee. All prices exclude VAT. Planned launch terms.

A standard Android till kit.

from about

€605

kit price from the supplier, including VAT

- 10–11" Android tablet
- Stand
- 80 mm receipt printer
- Cash drawer

Already have a tablet or PC?
We can often reuse it, if it meets the device requirements.

Hardware is priced separately from RANC OS (RANC OS prices exclude VAT). Card reader not included. iPad kit on request. Not yet tested on real printers or cash drawers.

Know a business?
Get rewarded.

Refer a new client. Once they sign up, you get:

ONLINE

1 month free

on your Online plan

LITE

€100 a year

Lite service plan for 2 years (instead of €200)

Planned for launch. Terms apply. Ask us for details.

Prices exclude VAT.

Four steps to start.

01 **Try our demo**

Two fictional businesses at ranc.ie/demo: Malahide Bean Café and Liffey Build Ltd. Everything stays in your browser.

02 **Book a free 20-minute chat**

Your till, printers, scanners, card reader, internet and products, so we can quote and reuse compatible hardware.

03 **Snap your menu**

Send a photo of your menu or price list.

04 **We set it up**

Once RANC OS is ready for your business, we install it for you.

Contact details on the next page.

Ready 2027.

Try it now with sample data.
